La Roche French Limestone Collection

The La Roche Limestone Collection is a nicely assembled and well curated grouping of limestones.

We hope that it calls to mind exotic settings that fire the imagination of our many clients and friends. The selection process we have used gave four unique color ways that, in our view, are perfectly suited for almost any current design plan.

Now, consider the ability to also work with different sizes and finishes as shown here. Please enjoy using this collection as much as we have putting it together! As a final point, limestone is classified as a sedimentary rock and has been used as a building material for centuries.

genova
brushed & tumbled tile
16"x24"x5/8"
in stock

V3 = MODERATE VARIATION:
While the colors present on a single piece of tile will be indicative of the colors to be expected on the other tiles, the amount of colors on each piece may vary significantly. For example "that little bit of color" on one piece of tile may be the primary color on the next piece.
