Metropolis

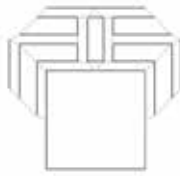

Metropolis; a term used rather vaguely in modern days but that is still widely recognized as a term of endearment when describing a city which had grown to become a cultural, business and technological hub.

We often tend to forget that a metropolis owes its growth and success to its citizen, who have over the centuries injected time and effort in creating a modern day mosaic through its ever evolving architecture and design.

Individuals from the world over, who migrate to such metropolitan areas bringing along with them their cultural heritage, adding to these great works of modern art an international flair. Such a metropolis ends up being a living portfolio of centuries of evolution, foreign influences, diversity and excellence in architecture and design.

We have chosen several of these modern day metropolis, who have over time strived and excelled in becoming design and lifestyle landmarks. The Metropolis Collection is an homage to each of these cities, a sign of gratitude to their designers, architects, artist and creators who have given the world so much beauty.

Metropolis Collection
